

Auto Repair Shops

Auto repair shops can **cut fuel gas costs** with a **natural gas pressure booster**

More than 400 leading auto repair shops in the United States and Canada use G-TEC Natural Gas pressure Booster Systems...names like Midas, Meineke, Car-X, Speedy, Cole and many independent shops.

A G-TEC Natural Gas Pressure Booster System connects to your building's utility gas service then boosts the pressure for high performance torch cutting and significant cost savings when compared to acetylene, propane or other cylinder gases.

Natural Gas Saves Money

- Natural gas saves up to 90% compared to acetylene and 50% compared to propane for equal heat performance
- Eliminate cylinder rental charges
- Don't keep cash tied up in cylinder inventory

G-TEC Systems Save Time

- No need to order, store move or change fuel gas cylinders – don't waste productive time

Natural Gas Is The Safest Fuel Gas

- Make your shop safer by eliminating cylinder gas storage
- Natural gas is lighter than air - leaks rise and dissipate
- Natural gas can be used at withdrawal rates higher than 15 psi

Listen To What G-TEC Owners Say...

I recommend it, it's cheaper, has good heat, and you don't have to change cylinders.

- Bristol, CT

No problems, one of the more reliable items I have in the shop.

- New Milford, CT

I pay \$12 per month for natural gas compared to \$ 350 per month for acetylene.

- Denver CO

**Approved By CSA-International
For Installation Anywhere!**

G-TEC Natural Gas Pressure Boosters are CSA approved for design, performance and safety. Fire Marshals will approve G-TEC installations without question.
